# Beamex Solutions for Calibration Excellence

Since its founding in 1975, **beamex** has been a trusted partner for calibration excellence, helping its customers to continuously improve efficiency, ensure compliance, and increase safety in their operations. **beamex** sets the industry standard with its way of working, its expertise, and its innovative calibration technology that provides accurate measurements, reliable data, and traceability.

With more than 50 years of experience in manufacturing and developing cutting-edge calibrators, systems, and services, Beamex is a trusted advisor for continuous process improvement and sustainable, safe operations.

Beamex has a comprehensive ecosystem of calibration solutions that covers everything from field calibration to workshop calibration, calibration management, and services. Through the company's global reach, its products and services are helping to create a safer and less uncertain world for customers across more than 90 countries.

## Beamex Calibration Ecosystem

Beamex calibration ecosystem is a unique combination of calibration software, calibration equipment and expert services, designed to improve your efficiency and increase accuracy, traceability and safety in your operations. Every component in the calibration ecosystem supports you throughout the solution lifecycle to meet your data-enabled business needs.

### Calibration Management

Beamex calibration management software lets you manage instrumentation assets and calibration procedures – what, when and how to calibrate. Analyze high-quality digital data, identify trends, create reports, generate calibration certificates and ensure compliance.

[Learn More →](#)

### Field Calibration

Versatile, accurate, and reliable field calibrators for on-site calibration. The Beamex MC6 family meets the diverse calibration needs of process industries worldwide, including hazardous environments.

[Learn More →](#)

### Workshop Calibration

The Beamex CENTRICAL is a central place for all your workshop calibrations. This standardized yet configurable solution is easy to use, versatile, and ergonomic for professional workshop calibration.

[Learn More →](#)

### Expert Services and Training

The Beamex team of experienced, world-leading specialists will guide you throughout the solution lifecycle, from definition to daily operation. We provide calibration services, repairs and convenient service plans to help you keep your equipment operating at its full potential.

[Learn More →](#)

## Why Choose Beamex Calibration Ecosystem?

### Secure Digital Data Flow and Data Enabled Decisions

Data is your most valuable asset. Our technology captures data digitally at the measurement source and ensures secure data flow between products and systems. A completely digital flow of traceable and reliable calibration data throughout your business improves efficiency and ensures compliance.

### Collaboration Platform

Beamex technology acts as a digital enabler. Our platform makes it possible for calibration work orders, data and insight to be shared across distributed organizations and between companies.

### Guided Calibration

Calibrate in the field with pre-defined calibration procedures and step-by-step guidance from your Beamex calibrator or application. With Beamex technology you can even fully automate calibrations, ensuring traceability and consistency every time.

### Calibration Excellence

We will help you develop your calibration program and to continuously analyze, improve, manage, and execute.

### Sustainable by Design

We design durable, scalable and highly configurable solutions that evolve to meet your changing needs.

## Interested in Beamex Solutions?

Contact us to discuss how Beamex calibration solutions can improve your operations, ensure compliance, and increase safety.

[About Accuro](#)

# About Us

Learn more about Accuro and our commitment to providing high-quality instrumentation and calibration solutions

[Our Values](#)

## What Drives Us

### Precision

Delivering accurate measurements and reliable calibration solutions that meet the highest industry standards

### Quality

Partnering with industry leaders like **beamex** to provide world-class calibration equipment and software

### Partnership

Building long-term relationships with our clients through exceptional service and dedicated support

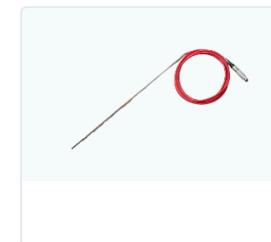

[Our Story](#)

## Our Company

Accuro is a leading provider of high-quality instrumentation and calibration solutions for various industries. We specialize in Beamex products, offering the best measurement and calibration equipment to ensure accuracy and reliability in your operations.

Founded with a vision to deliver excellence in calibration technology, we have grown to become a trusted partner for businesses across the Philippines and beyond. Our team of experts is dedicated to understanding your unique needs and providing tailored solutions that help you achieve optimal performance.

At Accuro, we believe in building long-term relationships with our clients, providing not just products but complete solutions that include training, support, and maintenance services.

[Our Mission](#)

## Why We Work at Accuro

At Accuro, we're driven by a passion for precision and excellence. Our team consists of dedicated professionals who are experts in calibration technology and committed to delivering the highest quality solutions to our clients.

We believe in the power of accurate measurements to transform industrial operations. Whether it's ensuring safety compliance, improving process efficiency, or maintaining product quality, we understand that calibration is not just a service—it's a critical component of operational success.

Our mission is to empower businesses with reliable calibration equipment and expert support. We work closely with each client to understand their unique challenges and provide tailored solutions that meet their specific needs. By partnering with industry leaders like **beamex**, we ensure our clients have access to the most advanced calibration technology available.

What sets us apart is our commitment to building long-term relationships. We don't just sell equipment—we provide comprehensive solutions that include training, ongoing support, and maintenance services to ensure our clients achieve optimal results.

# Who We Serve

Providing calibration solutions across diverse industries with precision and reliability

## Oil & Gas

We provide reliable calibration solutions for the oil and gas industry, ensuring accurate measurements and compliance with safety standards.

## Pharmaceutical

Our calibration solutions help pharmaceutical companies maintain precise measurements required for quality control and regulatory compliance.

## Power Generation

We serve power generation facilities with calibration equipment that ensures efficient operations and compliance with environmental regulations.

Providing high-quality instrumentation and calibration solutions for your industrial needs.

Calibration Software

# Calibration Management

Streamline your calibration processes with Beamex calibration management software

Why use software for calibration management? Manual calibration management can be time-consuming, error-prone, and inefficient, particularly for organizations with a large number of instruments.

Calibration management software automates calibration work scheduling, data collection, and reporting, reducing the risk of human error and saving time.

By centralizing calibration data, calibration software also improves traceability, supports compliance with standards like ISO 9001, and provides insights for decision-making and audit purposes.

We offer two calibration management software solutions, **Beamex LOGiCAL** and **Beamex CMX**. Both are designed to help you manage instrument assets, plan and execute calibrations, store calibration histories, and provide data for analysis, reporting and calibration certificates.

## Beamex LOGiCAL Calibration Management Software

Beamex LOGiCAL is a modern, cloud-based calibration software designed to streamline and digitalize your calibration processes. It offers an easy-to-use interface for managing, documenting, and storing calibration data securely in the cloud.

LOGiCAL helps eliminate manual data entry and paperwork, reducing errors and saving time. It integrates seamlessly with Beamex documenting calibrators, enabling automated data transfer for fast, reliable, and traceable results.

Whether you're calibrating pressure, temperature, or electrical instruments, LOGiCAL supports a wide range of devices and industries. Accessible from anywhere, it's ideal for teams working across multiple locations. LOGiCAL is a cost-effective way to bring efficiency, accuracy, and compliance to your calibration work.

[Read more about !\[\]\(ab585dcc444ae74af86fb025f2220621\_img.jpg\) LOGiCAL →](#)

Cloud-Based Solution

On-Premises Solution

## Beamex CMX Calibration Management Software

Beamex CMX is a comprehensive, on-premises calibration management software designed for industries with demanding compliance and quality requirements. It helps you plan, execute, analyze, and document calibrations efficiently while ensuring full traceability and data integrity.

CMX supports both manual and automated calibration workflows and integrates with Beamex calibrators and ERP/CMMs systems for a seamless process. It includes advanced features like risk-based calibration planning, audit trail, and electronic signatures, making it ideal for regulated industries such as pharmaceutical, energy, and food & beverage.

With CMX, you gain full control over your calibration program, improve productivity, and ensure compliance with industry standards and regulations.

[Read more about !\[\]\(b5cb6a3c6bab36e7cc651da65513c901\_img.jpg\) CMX →](#)

## TAKING CMX TO THE NEXT LEVEL

### CMX Analytics Dashboard

The Beamex CMX Analytics Dashboard provides an easy-to-use visual summary of your key calibration performance indicators.

[Read more about CMX Analytics Dashboard →](#)

### Beamex Business Bridge

Beamex Business Bridge is a commercial configurable solution for connecting Beamex CMX and maintenance management systems such as SAP or IBM Maximo.

[Read more about !\[\]\(485c12795462b65e0fde973d1914592c\_img.jpg\) Business Bridge →](#)

Field Calibration

# Field Calibration

Versatile, accurate, and reliable. The Beamex MC6 family of calibrators meets the diverse calibration needs of process industries worldwide.

Whether working in the field or in hazardous environments, the MC6 family of field calibrators offers models tailored to your requirements.

## Common Features of the Beamex MC6 Family

### Multifunctional Calibration

Provides calibration for pressure, temperature, and electrical signals in a single device.

### High Accuracy

Ensures precise measurements with traceable, accredited calibration certificates.

### Digital Data Flow

Documenting calibrators that connect with Beamex software, enabling paperless calibration.

### Durable Design

Built for demanding environments with an ergonomic, IP65-rated construction.

## Common Capabilities of the Beamex MC6 Family

- Pressure measurement (internal/external)
- Frequency measurement and generation
- Built-in 24 VDC loop supply
- Thermocouple measurement, two simultaneous channels
- Voltage measurement and generation
- Pulse counting and generation
- Resistance and RTD measurement, two simultaneous channels
- Thermocouple simulation
- Current measurement and generation
- Switch state sensing
- Resistance and RTD simulation
- HART, FOUNDATION Fieldbus, and Profibus PA communicator

### Beamex MC6

The MC6 is a high-accuracy field calibrator that offers calibration capabilities for pressure, temperature, and various electrical signals. It is also a multi-bus field communicator for fieldbus instruments.

[Read more about Beamex MC6 →](#)

### Beamex MC6-Ex

The Beamex MC6-Ex is the world's most accurate intrinsically safe field calibrator and communicator. It is ATEX, IECEx, and North American certified and can be used in all hazardous areas.

[Read more about Beamex MC6-Ex →](#)

### Beamex MC6-T

The Beamex MC6-T combines a state-of-the-art temperature dry block with built-in multifunction process calibrator and communicator technology.

[Read more about Beamex MC6-T →](#)

## Other Field Calibration Equipment

### Beamex ePG

Portable, battery-operated electric pressure pump and controller for industrial pressure calibration applications in ranges from -0.85 to 20 bar.

[Read more →](#)

### Beamex PG Calibration Pumps

Available pressure ranges: PGC (-0.95 ... 35 bar), PGM (0 ... 20 bar), PGHH (0 ... 700 bar), PGPH (-0.95 ... 140 bar), PGL (-400 ... 400 mbar)

[Read more →](#)

### External Pressure Modules

The Beamex EXT range of external pressure modules will increase your configuration possibilities, making it possible to calibrate even more pressure ranges with the same calibrator.

[Read more →](#)

### Smart Temperature Sensors

Beamex RPRT (up to 660 °C), IPRT (-45 to 300 °C), and SIRT (-30 to 155 °C) high-accuracy reference sensors for temperature calibration.

[Read more →](#)

Workshop Solutions

# Workshop Calibration

The Beamex CENTRICAL is a central place for all your workshop calibrations.

This standardized yet configurable solution is easy to use, versatile, and ergonomic. The Beamex CENTRICAL Workshop Calibration Solution reflects the result of decades of experience providing world-class solutions for the process industries.

The modular design makes CENTRICAL versatile and easy to configure according to your needs, with the ability to add or replace modules as needed.

Available CENTRICAL configurations include a bench, trolley or table-top solution.

## CENTRICAL bench

The Beamex CENTRICAL calibration and test bench is available as a straight bench and as a corner bench version.

## CENTRICAL trolley

The Beamex CENTRICAL trolley is equipped with wheels, an adjustable shelf, and a lockable drawer unit for storage.

## CENTRICAL tabletop

The Beamex CENTRICAL tabletop case is a convenient solution if you already have tables in your workshop.

## Benefit from a Fully Digital Workflow

### Connect with calibration management software

The MC6-WS Advanced Workshop Calibrator and Communicator is the heart of the CENTRICAL workshop calibration solution. It is a documenting calibrator that can connect with Beamex calibration management software, enabling a fully digital calibration data flow.

### Manage what, how, and when

You can use Beamex calibration management software to manage what, how, and when to calibrate, as well as to execute calibrations with the MC6-WS according to your pre-configured calibration procedure – even fully automatically.

#### Modular Design

Easily configure and expand your workshop solution with modular components that grow with your needs.

#### Digital Integration

Seamlessly connect with Beamex calibration management software for paperless, automated workflows.

#### Flexible Configurations

Choose from bench, trolley, or tabletop configurations to fit your workshop space and requirements.

## Transform Your Workshop Calibration

Discover how the Beamex CENTRICAL solution can streamline your workshop operations with modular, professional calibration capabilities.

Expert Services

# Services

Learn more about Beamex expert services, training, support, laboratories, recalibration services, repairs and service plans.

## Calibration Solution Services

Let the Beamex team of experienced, world-leading specialists guide you throughout the solution lifecycle, from definition to daily operation, and help you get the most out of Beamex calibration technology.

### Support Throughout the Solution Lifecycle

Beamex expert services encompass everything from initial discussion and design of your process to the implementation, training and support to ensure a successful adoption by the customer business.

#### Onboarding

System introduction, design, data migration, training and hypercare, available for both CMX and LOGICAL.

#### Training

Hands-on workshops, classroom lectures, online training and e-learning. Our international partners can offer training in your local language.

#### Support

Beamex Support Services aim to offer the best possible customer experience to Beamex customers worldwide.

#### Software Service Agreements

Full lifecycle service that helps you maximize the return on your software investment.

[Read more about Expert Services →](#)

## Equipment Services

We provide calibration services, repairs and convenient service plans to help you keep your calibration equipment operating at its full potential throughout its lifetime.

### Calibration and Repair Services

All instruments, including calibrators, need to be calibrated regularly. Keeping your calibrator up to date with regular calibration is important to maintain accuracy and compliance.

A traceable, accredited calibration certificate is needed if your plant operates according to a quality control system, such as the ISO 9001 quality control system, and/or if you must provide proof of measurements and traceability to your customers.

[Read more about Recalibration and Repair Services →](#)

### Service Plans

Maintain and protect your equipment with the Beamex service plans. The Beamex service plans are contracts that cover annual recalibrations, repairs, and much more.

#### Beamex Care Plan

- Free repairs, even with accidental damage
- Replacement of wearable parts
- Applicable updates of firmware
- Free shipments to and from the Beamex laboratory in Pietarsaari, Finland

[Read more →](#)

#### Beamex Calibration Plan

- Designed for products that are no longer in production
- For calibrators that can't go under a Care Plan
- Regular calibration services
- Maintain equipment accuracy and compliance
